

**CarEcology:
New Technological and Ecological Standards
in Automotive Engineering**

**Module 2
Energy Efficient Design of Powertrain and Body**

Table of contents	Page
Table of contents	i
List of contributors	iv
Chapter 1. Steering systems Dimitris SAVVIDIS (Module Leader)	
1.1. Review of design	
1.2. Steering systems	
1.3. Handling requirements and Regulations	
1.4. Steering geometry and kinematics	
1.5. Bump, Roll and Compliance steer	
1.6. Forces in Stationary and moving vehicles	
1.7. Four Wheel Steering (4WS)	
Chapter 2: Suspension systems Kalevi VESTERINEN	
1.8. Review of suspension types	
1.9. Suspension components	
1.10. Suspension kinematic and Force analysis	
1.11. Anti Squat and anti Dive Geometries	
1.12. Vehicle ride analysis	
1.13. Controllable suspensions	
Chapter 3: CAD/CAM/CAE software Walter JANSSENS	
1.14. Computer Aided Design (CAD)	
1.15. Computer Aided Manufacturing (CAM)	
1.16. Computer Aided Engineering (CAE)	
Chapter 4: Decelaration behaviour Dimitris SAVVIDIS	
1.17. Braking of road vehicles	
1.18. Friction, materials, brake design analysis	
1.19. Braking distribution and adhesion utilization	
1.20. Braking proportioning	
1.21. Passenger brake systems and braking for articulated vehicles	
1.22. ABS for cars trucks and buses, Retarders, Air braking systems, Traction control systems,	
1.23. Electronic Braking systems	
1.24. Case studies	
Chapter 5: Road loads Dimitris SAVVIDIS	
1.25. Road loads due to aerodynamic forces	

- 1.26. Aerodynamic design of vehicles
- 1.27. Load transfer due to cornering
- 1.28. Roll over stability
- 1.29. Vehicle mechanics
- 1.30. Forces, aerodynamic, rolling resistance, Limiting frictional force available

Chapter 6: Automotive noise sources control and criteria
Laurent KEERSMAEKERS

- 1.31. Engine noise
- 1.32. Transmission noise
- 1.33. Intake and exhaust noise
- 1.34. Aerodynamic noise
- 1.35. Tire noise
- 1.36. General noise and control technologies
- 1.37. Noise criteria

Chapter 7: Acceleration behaviour
Dimitris SAVVIDIS

- 1.38. Tractive resistance and tires properties
- 1.39. Engine characteristics
- 1.40. Transmission characteristics
- 1.41. Traction and power limited calculations
- 1.42. Fuel economy

List of contributors

Dimitris Savvidis (Module Leader)
EU Commissionar
Brussels, Belgium

Kalevi Vesterinen
Department of Automotive and Transportation Engineering
Turku University of Applied Sciences
Turku, Finland

Walter Janssens
Karel de Grote-University College
Department of Industrial Sciences & Technology
Antwerp, Belgium

Mark Pecqueur
Karel de Grote-University College
Department of Industrial Sciences & Technology
Antwerp, Belgium

Laurent Keersmaekers
Karel de Grote-University College
Department of Industrial Sciences & Technology
Antwerp, Belgium

Editor:
David Perry
School of Design Engineering
Universidad Politécnica de Valencia,
Valencia, Spain

Project Coordinator:
Sofie Krol
Karel de Grote-University College
Department of Industrial Sciences & Technology
Antwerp, Belgium
